PROFILE

Aeronautical Engineering professional with experience in **aircraft maintenance, airworthiness management, technical documentation, maintenance planning, aircraft systems reliability analysis and technical records management**. Strong foundation in **aircraft design, systems, regulatory compliance, and maintenance procedures**.

Complementary expertise in **software development, automation, AI, databases, and engineering technology**, enabling the integration of digital solutions.

EDUCATION

Bachelor of Engineering in Aeronautical Engineering
The Technical University of Kenya
5th July 2019 – 26th November 2024
2nd Class Honors – Upper Division

High School Education
Kanga High School
11th February 2015 – 23rd November 2018
K.C.S.E. Grade A- (A minus)

INDUSTRIAL TRAININGS

Safety Management System	**Air Direct Connect Limited**	June 2026
Quality Management system: ISO 9001:2015	**Alison Int - Online**	September 2026
Battery Maintenance and Servicing	**Phoenix Aviation Limited**	December 2025
Aircraft Maintenance Procedures	**Air Direct Connect Limited**	July 2025 – Sept 2025
Aircraft Maintenance Production Planning and Control	**Phoenix Aviation Limited**	June 2025 - July 2025

PROFFESIONAL EXPERIENCE

Aircraft Maintenance Planning & Technical Services Officer
25th September 2024 – Present
J.K.I.A – AMSL /ADC Hangar
Air Direct Connect Limited (ADC): *Aircraft Maintenance Planning, Production Planning, Reliability and Technical Services (Boeing 737-300, DHC 8 – Q400), Part-time Avionics and Battery Servicing Technician (NiCAD, Lead Acid and Lithium Batteries), SAMS Aviation Management Software.*

Junior IoT developer (Embedded systems)
September 2025
Part time - Nairobi
QuePay Limited: *Pilot phase implementation of IoT protocol (MQTT)*

Aircraft Maintenance Internship
12th July 2024 – 25th September 2024
J.K.I.A - AMSL Hangar
Air Direct Connect Limited (ADC): *Aircraft Maintenance Planning & Technical Records, Wheels and Brakes Maintenance, Aircraft Maintenance (Boeing 737-300, DHC 8 – Q400)*

Aircraft Maintenance Technician Attachment
3rd May - 9th July 2024
Wilson Airport (NPSAW Hangar, HeLint, NASD Hangar)
National Police Service: *Aircraft maintenance Mi-17V-5 Helicopters, Cessna Caravan 208B. Airframe and engine maintenance.*

School Industrial-Based Training/Attachment (Non-Destructive Inspection)
July 2023 - September 2023
JKIA (KQ Workshop-NDT)
Kenya Airways (KQ): (Workshop and Hangar Maintenance)
Wheels and Brakes Maintenance and Repair, NDT- Eddy Current Testing, Liquid Penetrant Testing, Ultrasonic Inspection, Magnetic Particle testing, Aircraft Maintenance Technician

TECHNICAL KNOWLEDGE & SKILLS

Engineering

Technical Services

- MSG3 Planning Philosophy
- Work Package Preparation and Review
- Aircraft Maintenance Production Planning
- Reliability Analysis
- Evaluation of Technical Documents (ADs &SBs)
- Aviation Legislation (KCARs)
- Maintenance and Operation Technical Records Review

Maintenance

- Wheels and Brakes Repair and Overhaul
- Battery Servicing, Repair and Overhaul (NiCad & Lead Acid)
- Aircraft and Aircraft Systems Maintenance
- Automobile Enterprise Resource Planning

Computer Aided Design (latest software versions used)

- 3D Modelling [SolidWorks 2025, OnShape]
- Computational Fluid Dynamics Analysis [Ansys 2025]
- PCB Design [KiCad v9.0]
- Finite Element Analysis [Ansys Fluent 2025]

Software Development and Computer Skills

- **Databases** — PostgreSQL, MySQL, MongoDB
- **Programming and Scripting Languages** — JavaScript, Python, C#, C++
- **Backend Technologies** — Flask, Fast API, NodeJS (Express Js), Fast API
- **Frontend Technologies** — ReactJS, PyQT5, Vanilla JavaScript
- **Scripting and Automation** — Arduino & Raspberry 4+
- **Microsoft Technologies** — Ms. Word, Ms. Excel, Ms. Publisher, Ms. Access database
- **Artificial Intelligence** — NLP and deep learning model development, AI API integration

Workshop skills

Internal Industrial Based Learning II (Technical University of Kenya): June – August 2023

- Reverse Engineering and Rapid Prototyping
- Programmable Logic Circuits
- Computer Aided Design
- Manufacture-Programmable Lathe Machining

Internal Industrial Based Learning I (Technical University of Kenya): September-December 2022

- Welding, riveting structural metal-work
- Basic Structural Fabrication
- Analogue Lathe Machining
- Circuit board design and Arduino Programming

Soft Skills

- Adaptability
- Time Management
- Teamwork
- Critical Thinking
- Problem Solving
- Creativity
- Emotional Intelligence

INDUSTRIAL PROJECTS AND PROFFESIONAL AFFILIATIONS

Royal Magic Automobiles (Software Design and Development) February 2024 - Present

Maintenance and Updates for the Vehicle Maintenance and Facility Inventory Management system (for car spare parts, maintenance tools and facility Labor planning, assignment and update Processes)

AERIS Aviation Management Software (System Design and Development) October 2025 – June 2026

An Aviation Management System for Aviation Enterprises managing AOC, AMO and Integrated CAMO operations consisting of 13 modules common of which include; maintenance planning, work order management, Stores and Logistics management, Aircrafts, Aircraft Systems and Component Reliability Assessment, Aircraft and components tracking and records management.

LANGUAGES

Kiswahili Fluent Listener, Fluent Speaker, Advanced reading and Writing

English Fluent Listener, Fluent Speaker, Advanced reading and Writing
